Teksts: logopēde Adrija Brantevica

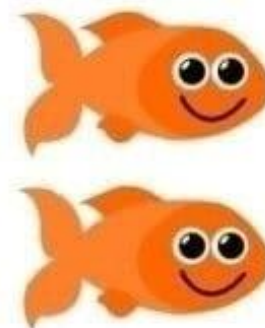

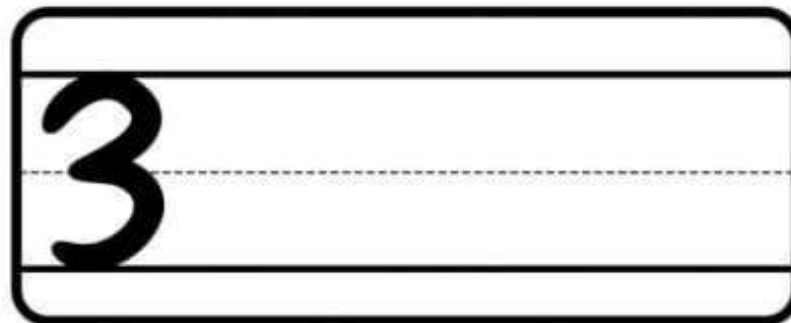

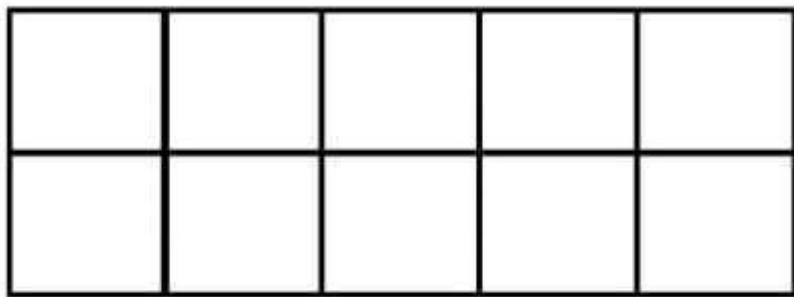

Peld viena zivs un domā:
Tukšs liekas akvārija trauks,
Ja blakus nepeld draugs!

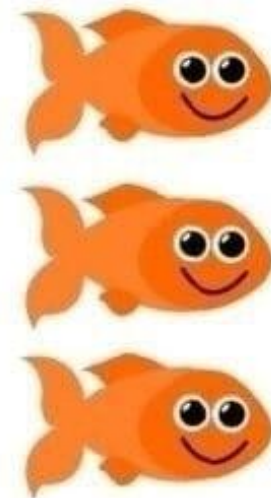

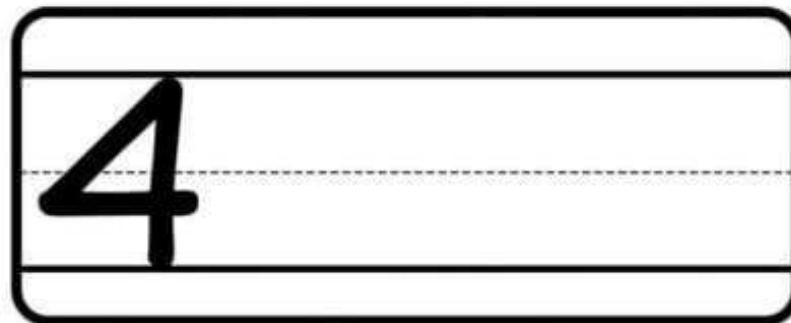

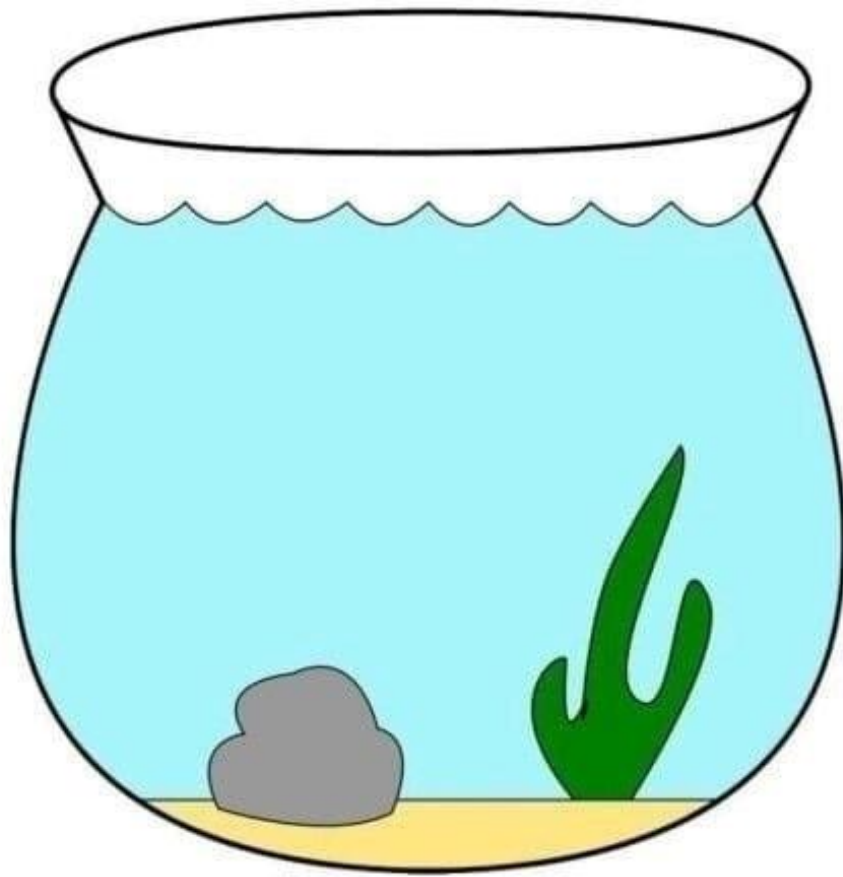

Zivs grib satikt zivi,
Kopā iznāk divi.

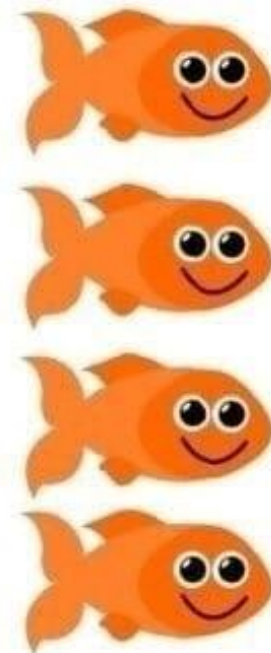

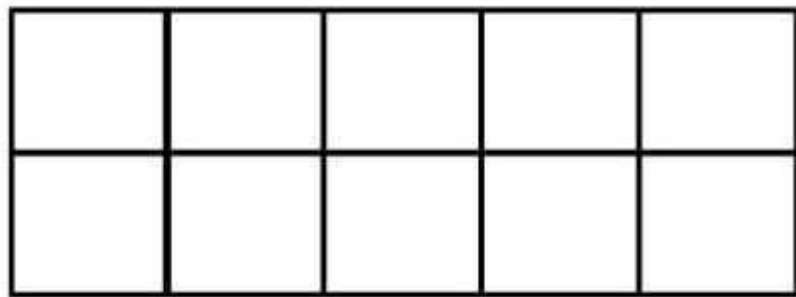

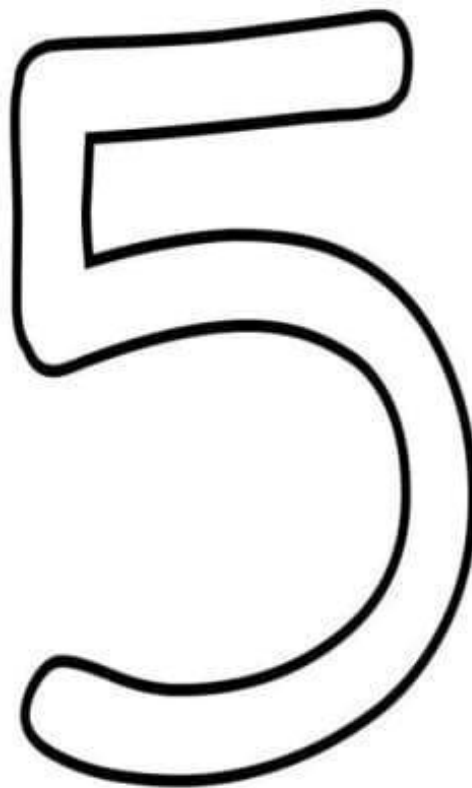

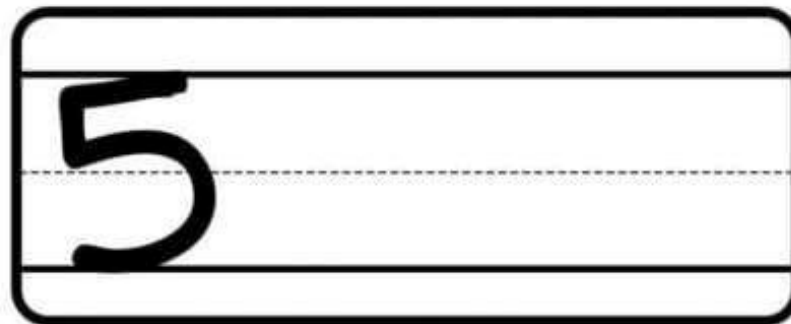

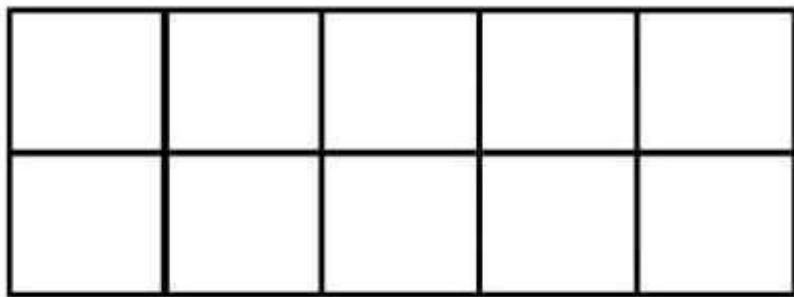

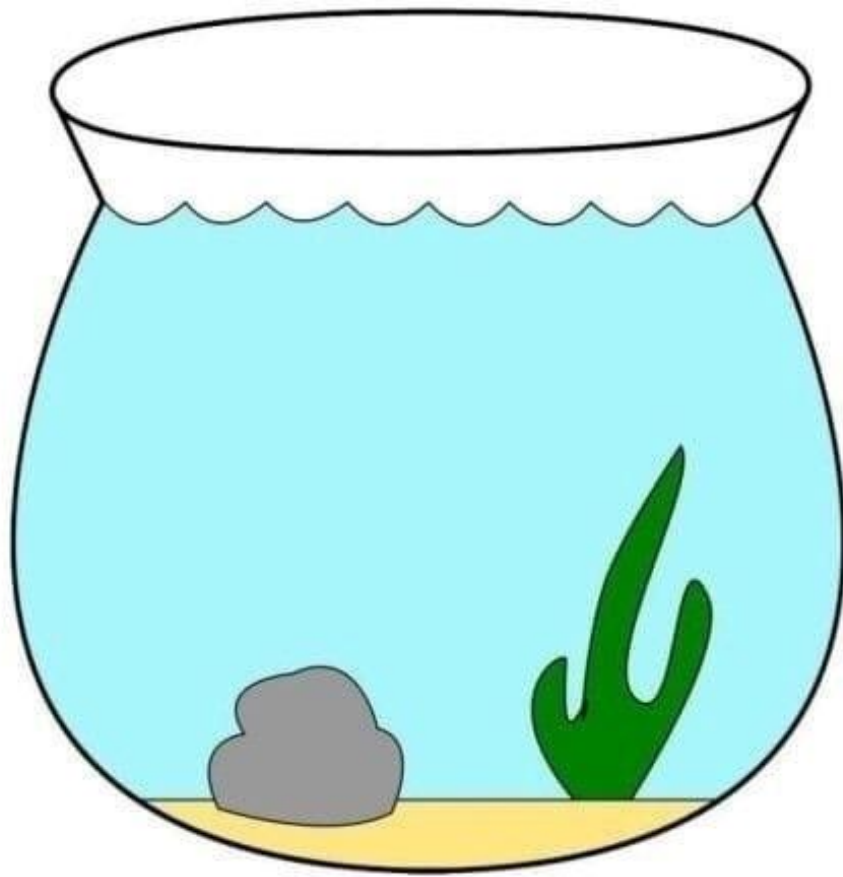

Akvārijā ūdens tīrs.
Pie divām zivīm pieliec vienu,
Nu, ir trīs!

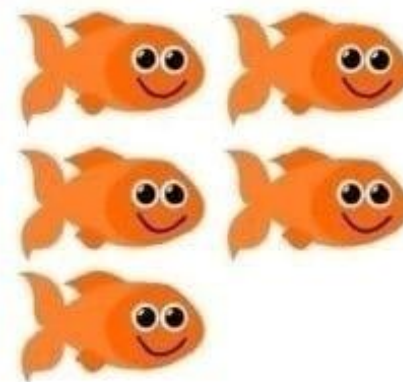

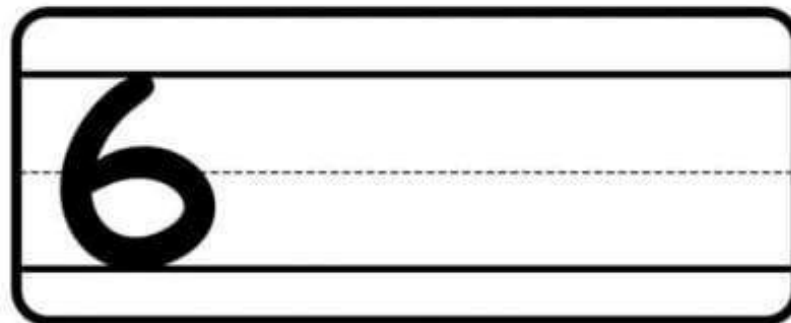

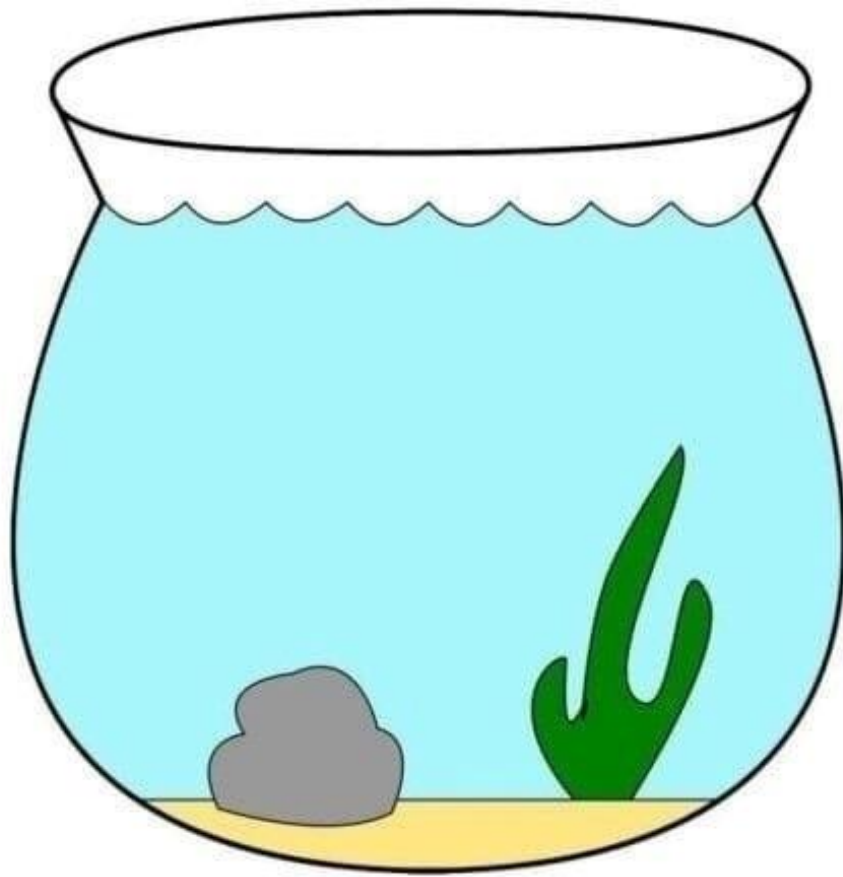

Trīs zivis jautras kļūs,
Ja akvārijā četras zivis būs!

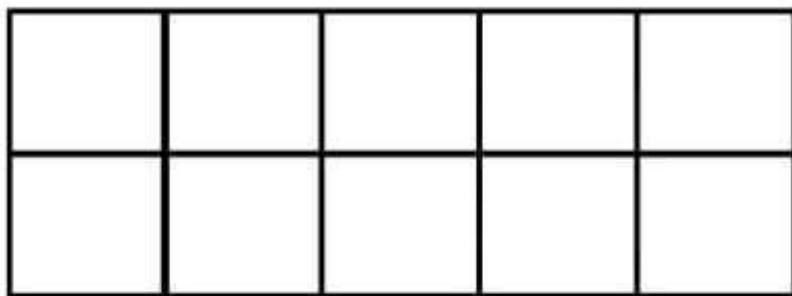

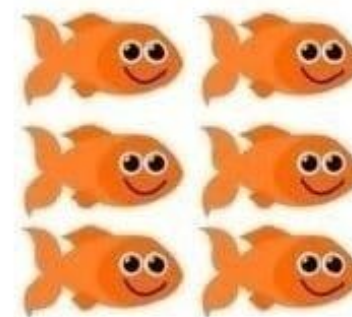

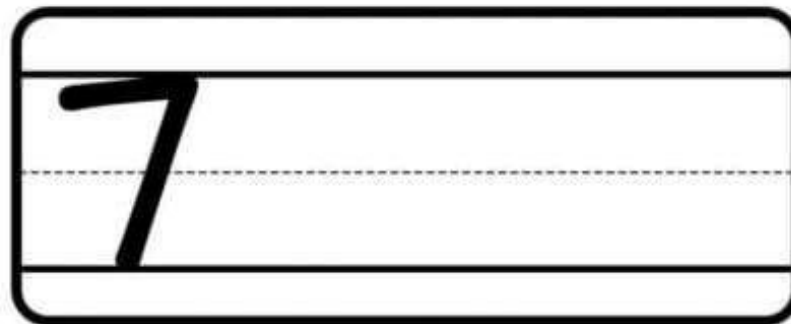

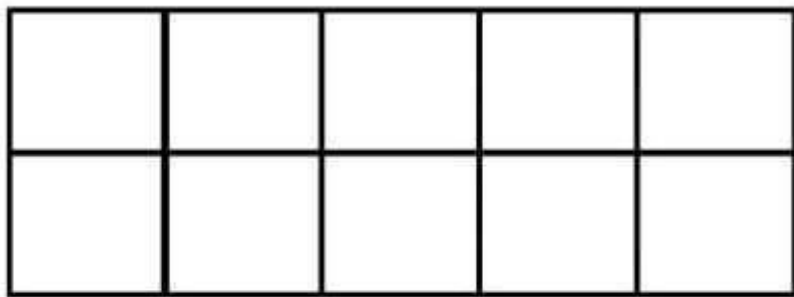

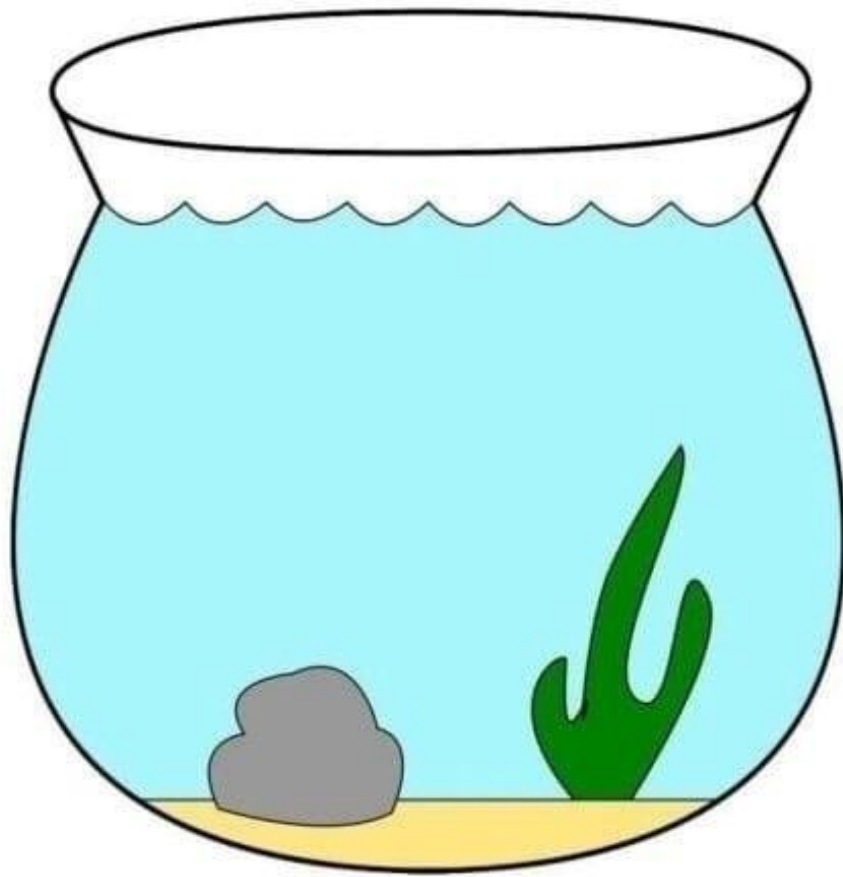

Viens, divi, trīs, četri.
Vēl vienu zivi akvārijā liec.
Un pie piecām zivīm tiec!

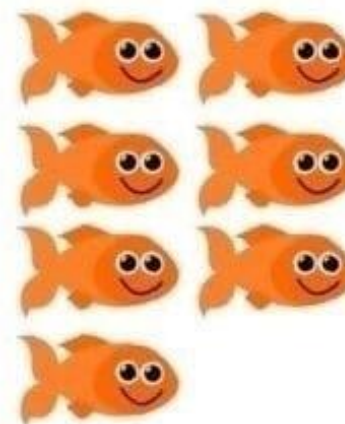

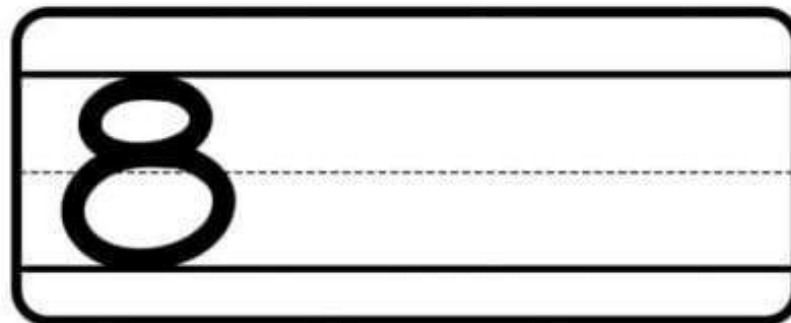

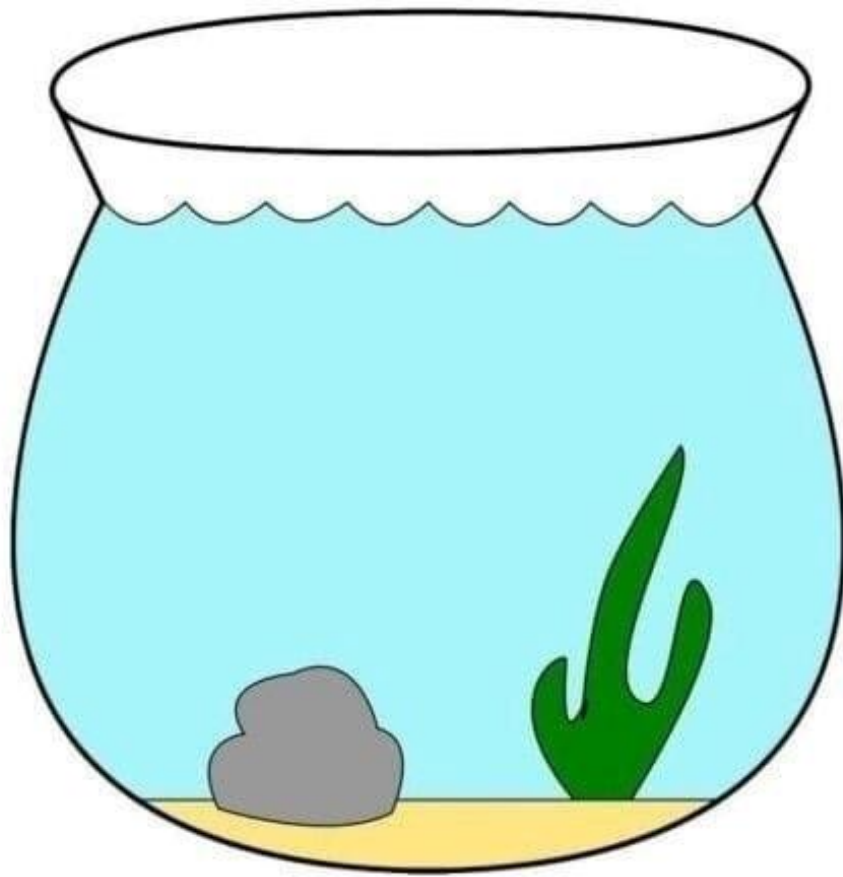

Piecas zivis mīļas, draudzīgas,
Nav jau svešas!
Ielec akvārijā vēl viena,
Nu ir sešas!

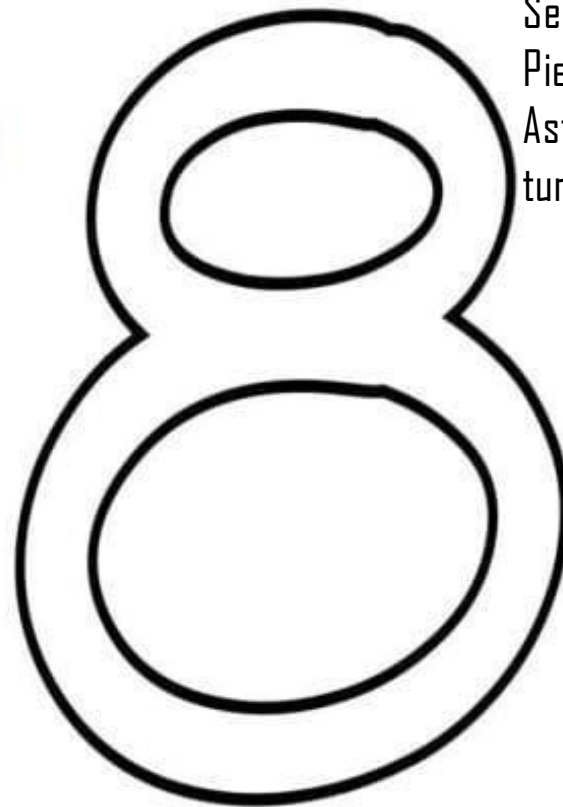

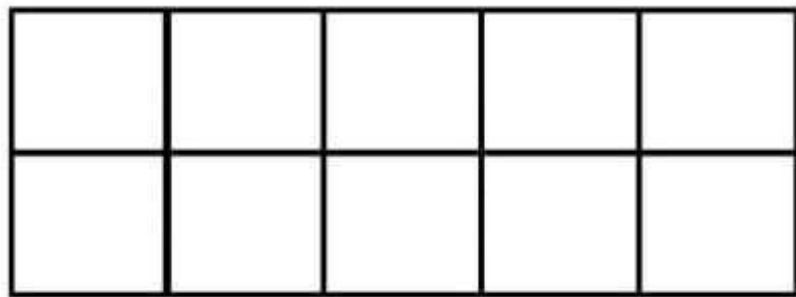

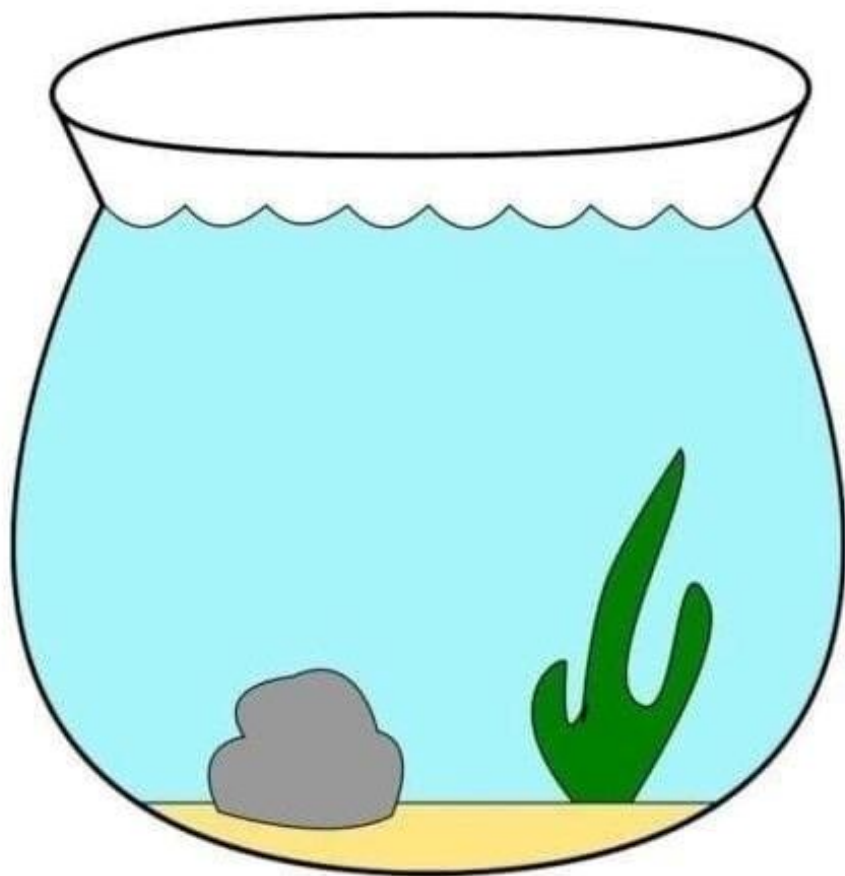

Sešas zivis ūdeni šļaksta,
Ar spurām sānus baksta.
Skaties, mums vēl viena klāt!
Tagad septiņas zivis var ar astēm
māt!

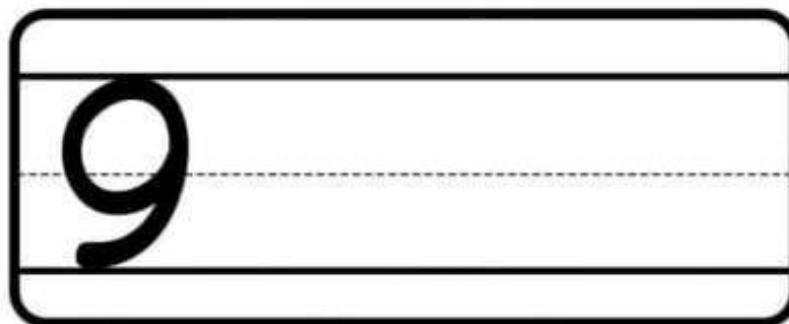

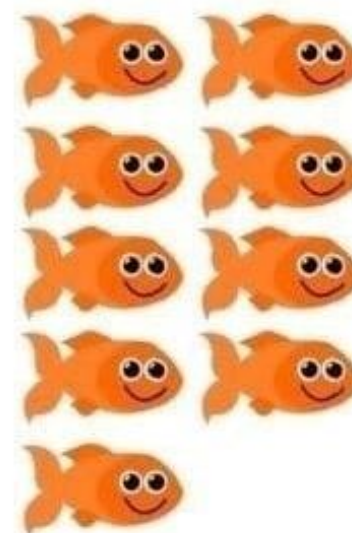

Septiņām zivīm septiņi burbuļi,
Pieliec vēl vienu klāt.
Astoņas zivis burbuļot var
turpināt.

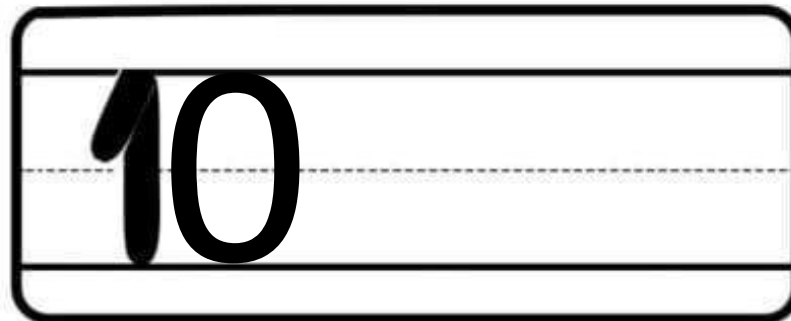

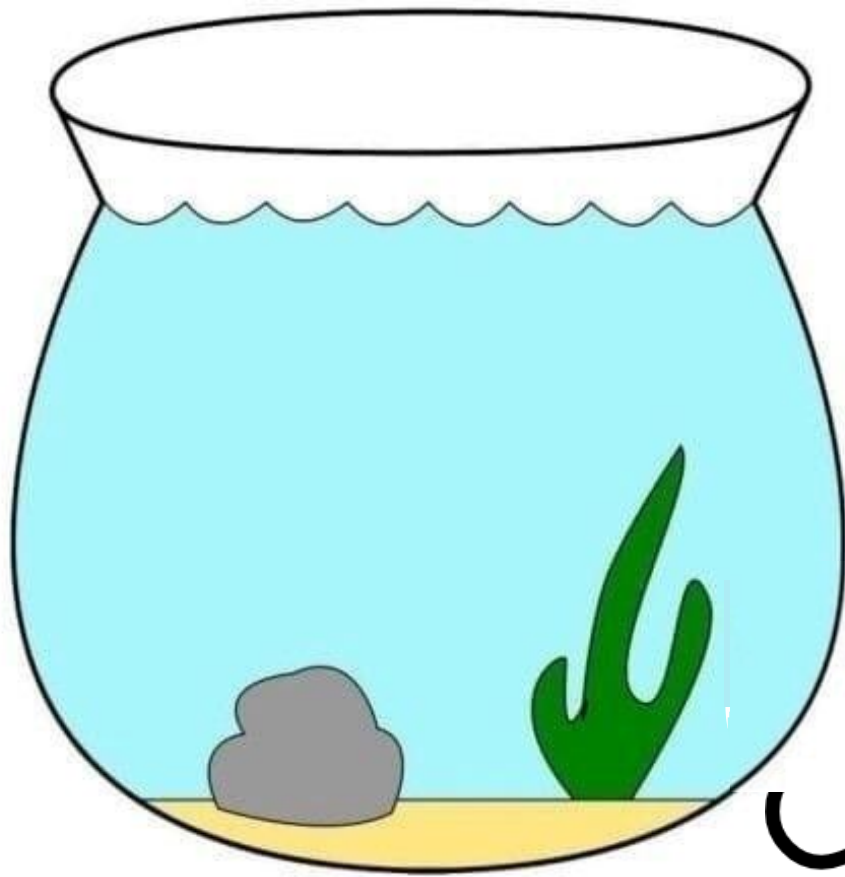

Astoņas zivis,
Četri zivju pāri.
Šaspiežas un sagaida
devīto zivi arī!

Deviņām zivīm acis lielas.
Akvārijā vairs nav vietas!
Bet tā mazā – desmitā,
Lai vēl pievienojas bariņā!
